EDUCATION

Master of Engineering, MEng

Vytautas Magnus University

2018-2020

Advanced scientific methods for evaluation of manufacturing engineering structures and performance.

International Business and Marketing

Kaunas University of Technology

2017-2018

Marketing and communication, corporate finance, business management.

Informatics engineering, BComp

University of Applied Sciences

2014-2017

Algorithms and machine learning, UI/UX design, foundations of development, ways of working;

LANGUAGES

- English (Proficient)
- Danish (Native)
- Lithuanian (Native)

PROFILE

Highly experienced Senior Software Engineer specialising in JavaScript and TypeScript. Proven track record in large organizations, making informed architectural decisions and translating technical concepts. Proficient in JavaScript (including DOM manipulation) and TypeScript, with expertise in StencilJS, Design Systems, Component libraries, and Accessibility. Strong collaborative team player with a deep understanding of ReactJS. Let's connect for potential collaborations.

WORK EXPERIENCE

Senior Software Engineer

Lead Software Engineer in Telia Design System team, which was nominated to be one of the best Design Systems in Finland. Created understandable and reachable OKR's for the development team, aligned in between businesses;

Telia Global Services

2021-present

- Worked closely with the team to enhance the consumption of our internal Design System, resulting in a remarkable 65% increase.
- Developed secure, well-tested JavaScript and TypeScript code, creating accessible web components using StencilJS across ReactJS, AngularJS, and VueJS frameworks.
- Led initiatives to address technical debt, ensuring the Design System's flexibility and adaptability to meet evolving needs.
- Implemented the Figma API, enabling seamless synchronisation between Figma and code. Leveraged AWS Style Dictionary to efficiently distribute design tokens.
- Managed the implementation and maintenance of internal analytics data gathering tools on AWS. Visualised valuable data insights using AWS QuickSight.
- Orchestrated robust CI/CD pipelines using Github Actions and Workflows, alongside Storybook previews on AWS. This facilitated smooth package releases on NPM.
- Elevated testing quality by integrating Percy for visual regression testing within our CI/CD pipelines.
- Advocated for and ensured compliance with WCAG accessibility requirements, highlighting the importance of accessibility within the organization.

Senior Software Engineer

Senior Software engineer responsible for UI development and business logic implementation in PWA solution which is used by companies such as AutoScout, Yamaha, Fisker, KTM, Piaggio.

Santander and Appgile

2022-present

- Built and maintained a robust PWA solution using JavaScript, TypeScript, and StencilJS. Integrated the solution seamlessly into various consumer environments, including ReactJS, AngularJS, and KnockoutJS.
- Implemented improvements to the code structure, enhancing maintainability and readability. This resulted in increased developer productivity and reduced the likelihood of errors.
- Employed different data handling and caching techniques to optimize the application's performance. These optimizations led to faster loading times, smoother user experiences, and improved overall efficiency.

EXPERTISE

- Ability to solve complex technical problems, including architectural decision making in large agile organisations by setting and achieving understandable and reachable OKRs;
- Ability to work in a highly intensive agile environment, familiar with Scrum and Kanban methodologies;
- Ability to provide estimations and costs for the business;
- Demonstrable ability to take ownership, learn and adapt, continuous learning attitude;
- Mentorship of the developers, including assisting with hiring processes and employees onboarding;
- A team-player with the ability to work in globally distributed teams.

TECHNOLOGIES & TOOLS

Stencil, React, Next, Gatsby, Node, SASS, Github, AWS, Vercel, Contentful, Wordpress, Design Systems, Web Components

CERTIFICATES

- AWS Certified Cloud Practitioner (ongoing)

WORK EXPERIENCE

Software Engineer

Software Engineer responsible for development and maintenance of B2B project Talech.com, Talech B2C commerce solution, written with KnockoutJS, React and JQuery;

US Bank Corp.

2020-2021

- Responsible for development and maintenance of B2B project Talech.com, Talech B2C commerce solution, written with KnockoutJS and JQuery;
- Was responsible for development of internal and 3rd party cookies handling logic and the UI, including handling different compliance levels across countries;
- Maintained full project life-cycle including testing, debugging, designing and coding;
- Supported Tech Lead by mentoring more inexperienced developers including pair programming;
- Worked close with the backend and QA teams, provided valuable feedback for API and testing improvements.

Software Engineer

Developed streaming platform MVP with Node.js and React, including automated testing and collaboration with backend developers. Actively participated in planning and coordination for successful project execution.

SpeakerBee A/S

2020

- Developed a streaming platform MVP, utilizing Node.js and React (Gatsby) for backend and frontend respectively.
- Automated testing using Jest and Puppeteer to ensure high-quality and reliable functionality.
- Collaborated closely with backend developers, providing valuable feedback for API improvements.
- Active involvement in planning and estimation sessions with stakeholders.

Senior Software Engineer

As a highly regarded talent on Upwork, I have consistently achieved a 100% success rating, indicating a track record of delivering exceptional results. Here are some key highlights of my experience:

Upwork

Since 2015

- Established strong and long-term partnerships with clients, ensuring collaboration based on effective ways of working and clear quality measurements. This approach fostered productive and successful relationships built on trust and mutual understanding.
- Demonstrated versatility by working with a diverse range of technologies, infrastructures, and frameworks. These include Stencil, React, Next, Gatsby, Vue, Contentful, Wordpress, AWS, Vercel, and more. This breadth of experience allowed me to adapt to different project requirements and deliver optimal solutions.
- Engaged with both large Agile organizations and startups, showcasing adaptability and an ability to thrive in various work environments. This experience has provided me with a deep understanding of different team dynamics and project management methodologies.
- Provided guidance and supervision to companies and individuals on topics such as Web Components, Design Systems, and Accessibility. Leveraging my expertise in these areas, I offered valuable insights, best practices, and recommendations to ensure the successful implementation of these critical aspects.
